eHealth HUB

X eHealth Roadshow @ L'université d'été de la e-santé/eHealth Summer University in Castres

The international **eHealth Summer University in Castres** is a not to be missed event for key players and decision-makers from the healthcare/social and technological innovation sectors. This year's edition was organised by the initiative of Castres-Mazamet Technopole BIC in Castres, France from 02-04 July.

The eHealth Hub initiative contributed to the diversified conference programme with the **eHealth roadshow taking place on 03 July**. As the event was organised contributing to the "AI and Health morning", the roadshow focused on AI solutions in the field of digital health. For innovative SMEs the roadshow was an excellent chance to showcase their products in front of an expert panel and gain valuable feedback on their solution.

Among the 3 high-level Committee Members had been – Professor G.P. Li, Director of the Centre for Artificial Intelligence in Diagnostic Medicine at the University of California, Vincent Templier, CDO from Montpellier University Hospital and Dr Osama El Hassan, Head of EHealth from Dubai Health Organisation.

In 4 minute pitches, the selected SMEs presented their highly innovative AI solutions in the healthcare field. AeroHealth.ai developed a Virtual Doctor on Board able to answer medical questions during flights. ANAMNESE provides a set of interoperable and flexible tools that helps optimising the patient care course. CODESNA evaluates and manages chronic stress scientifically in a simple and reliable way. Cardiomo offers an easy solution for monitoring heart health in real time. Each presentation was followed by a lively discussion among the SMEs and experts. After the event the networking continued and interesting contacts have been made.

"At CODESNA, we are excited about the prospect to improve chronic stress prevention at international level, and it was great to be able to present and have direct feedbacks from the jury and benefits from their views and perspectives."

Marc Latouche, CODESNA

More information about the eHealth Roadshows and other services offered by the eHealth hub can be found on the eHealth Hub website and Twitter channel @EU_eHealth_Hub.
